

The Highest Standards... The Safest Drinking Water

innowave Chiller SPORT™

Water - Drink 8 a Day

Health care professionals recommend that the average person drink at least 8 - eight ounce servings of water every day. Unfortunately, over 2,100 contaminants have been identified as potential threats to the drinking water supply. They fall into four groups: Organic, Inorganic, Biological and Radioactive. A point-of-use water treatment system is ideal for consumers concerned about their local water quality, or who are simply looking to have better tasting water.

Filtration Technology Enhances Drinking Water

The innowave Chiller Sport™ uses 3-stage filtration to treat drinking water. First, a 5-micron Sediment filter traps sediment and solid particle matter. Then, a 1-micron Carbon Block filter reduces contaminants as small as 1-micron. Next, a Granular Activated Carbon filter reduces chlorine and polishes taste.

Tested & Proven to Perform

The 1-micron filter used in the innowave Chiller Sport™ has been tested and certified by WQA according to NSF/ANSI Standard 53: Drinking Water Treatment Units - Health Effects for the reduction of at least 90% of lead and 99.99% of cysts. The 1-micron and Granular Activated Carbon filters have also been tested and certified to NSF/ANSI Standard 42: Aesthetic Effects for the improvement of taste and odor and aesthetic chlorine reduction. The innowave Chiller Sport™ has been tested and complies with UL Standard 399.

ITS™ Controls Bacteria

The innowave Chiller Sport™ is also equipped with ITS™ (In-Tank Sanitization). This feature utilizes ultra violet light as an effective method to prevent the potential for biofilm (slime) buildup in the storage tank after chlorine has been reduced through carbon filtration. Ultra violet technology also helps reduce any heterotrophic bacteria that may occur in drinking water.

Say Goodbye to Bottles

The innowave Chiller Sport™ is not a bottled water system. There are no heavy bottles to lift, store or replace. This eliminates the need for outside deliveries and enhances building security. Ordinary tap water is treated at the point-of-use, eliminating the risk of recontamination that could be caused by additional pipes or plumbing. The innowave Chiller Sport™ provides a continuous supply of great-tasting water dispensed at hot or cold temperatures.

A Mutual of Omaha Subsidiary

Proudly, innowave incorporated is a subsidiary of Mutual of Omaha, which has a distinguished history of commitment to wildlife and conservation. As providers of products and services that impact the wellness of society, together we recognize safe drinking water's important role in keeping people healthy.

innowave Chiller Sport™ Treatment Process

- 1 Sediment Filtration**
 - Reduces particles as small as five microns (0.0002 in.)
 - Reduces sediment
 - Adds to the life of the carbon filter
- 2 Micron Filtration**
 - Traps contaminants as small as one micron (0.00004 in.)
 - Reduces chlorine and organic contaminants
- 3 Filtration (granular activated carbon)**
 - Improves taste and odor
 - Reduces chlorine
- 4 Ultra Violet Light**
 - Reduces heterotrophic bacteria
 - Valuable alternative to chlorine

innowave Chiller SPORT™

Filtration Technology

- 3-stage process ensures great-tasting, high-quality water
- 5-micron Sediment filter reduces sediment and solid particle matter
- 1-micron Carbon Block filter is effective in reducing chlorine, lead and cysts
- Granular Activated Carbon filter enhances taste and odor of water and reduces chlorine

ITS™

- In-Tank Sanitization (ITS™) utilizes ultra violet light to prevent build-up of biofilm (slime)
- Reduces the need for preventative maintenance and improves drinking water quality

Independent Testing

- 1-micron filter tested and certified by WQA according to NSF/ANSI Standard 53: Drinking Water Treatment Units – Health Effects for the reduction of lead and cysts
- 1-micron and Granular Activated Carbon filters have been tested and certified to NSF/ANSI Standard 42: Aesthetic Effects for the reduction of chlorine and improvement of taste and odor
- Tested to UL Standard 399 to meet safety requirements

No Bottle Hassles

- Automatically refills for a virtually endless supply
- No bottles to lift, store or replace
- System maintained by your innowave Dealer
- No deliveries enhances building security

A Versatile System

- Provides cold and optional hot water
- Conveniently accommodates large sport mugs and bottles up to 9.5" tall

High Standards for Service

- Filters replaced routinely by qualified innowave service technicians
- Preventative maintenance performed

Technology Comparison Chart

	Taste & Odor	Chlorine	Organic	Inorganic	Biological	Radioactive
Bottled Water	●	?	?	?	?	?

KEY ○ NO ○ PARTIAL ● YES ? DEPENDENT ON WATER SOURCE AND TREATMENT USED

innowave Chiller Sport™ Specifications:

Height: 46" (117 cm) **Width:** 15" (38 cm) **Depth:** 14" (36 cm)
Water Connection: 1/4" tubing **Weight:** 68.3 lb. (30 kg)
Electrical Supply: 120V/60Hz
Amps: 8.3 amps for hot/cold units, 1.8 amps for cold units
 All figures are approximations and are subject to change.

The innowave Chiller Sport™ is not for residential sale in CA or WI and is not for sale in MA and IA.
