

The Highest Standards... The Safest Drinking Water

innowave

uvf³TM

Latest in Bottle-less Technology

The innowave uvf³TM is the most attractive unit on the market today. Its sleek design executed in two-tone silver and charcoal is among the easiest systems to install, service and maintain. Treating incoming tap water at the point-of-use, the innowave uvf³TM completely eliminates bottles and their related hassles.

UV Disinfection and Filtration

Tap water is treated via a highly effective three-stage process. A 1-micron carbon block filter and a granular activated carbon filter are followed by an exclusive in-tank UV lamp design. Water from the innowave uvf³TM tastes great, whether you prefer hot or cold water. The high capacity tanks assure there is always plenty of cold water.

Smartest System on the Market

The filter timer alerts you when the filters need changing. The Automatic Purity Monitoring System (APMS) notifies the need for UV lamp replacement. The flow counter option monitors how much water is treated. These smart features monitor the system making sure you are always getting the best quality water.

User Friendly and Cost Efficient

The innowave uvf³TM talks your language, featuring a PCB that communicates in three languages. The LCD read out can be programmed in English, Spanish or French, to meet the needs of your local market. The "Sleep Mode" feature optimizes power usage by hibernating during low usage periods, such as nights or weekends. Field servicing through the flip top makes preventive maintenance a process of just minutes every six-months.

Features Customers Love

A unique pop-up cup holder option can be installed in the base of the unit. It also provides storage for extra cups and supplies. A large drip tray with an overflow protection sensor reduces the potential for spills. If there is access to a drain, a convenient drip tray drainage option can be installed.

A Mutual of Omaha Subsidiary

This unique system is available only from innowave incorporated. innowave is a subsidiary of Mutual of Omaha, a company known for its distinguished history of commitment to wildlife and conservation. innowave recognizes the important role of proper hydration and that safe drinking water plays a vital role in maintaining good health.

innowave uvf³TM Treatment Process

- 1-Micron Carbon Block Filter
- 2 Granular Activated Carbon Filter
- 3 Ultra Violet Light*

*Cold Water Only
